our clients

1. Project phases

01

Analysis

understand business cycle and client needs for each app, and offering tailored solutions for his needs

02

Implementation

the process of setting up and configuring the system to meet the specific needs of a business. This phase is critical as it ensures that the ERP solution is aligned with the business's processes, objectives, and workflows

03

Training

ensuring that the end users are proficient in using the system, can perform their roles effectively, and understand how Odoo can streamline business processes

04

Testing

The testing phase is designed to verify that all configurations, customizations, and integrations work correctly and that the system meets the business's functional and technical requirements.

05

Live

Once testing is successfully completed and all issues are resolved, the Odoo implementation moves to the Go-Live stage, where the system is rolled out for real-world use.

06

Support

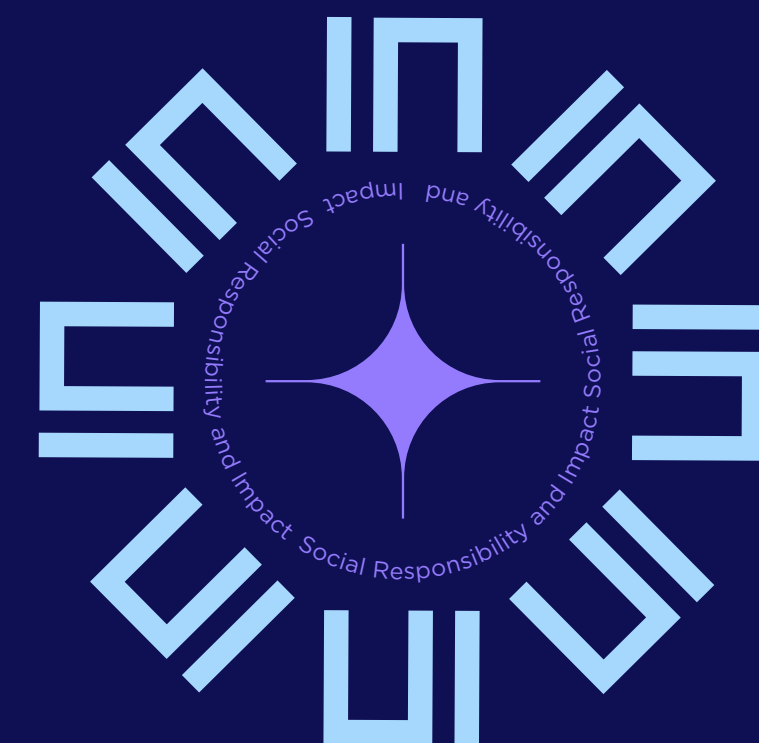

After go-live, users might encounter system issues such as bugs, performance bottlenecks, or unexpected behavior. The Odoo support team addresses these technical problems, ensuring they are resolved promptly to avoid disruptions.

Technical support

We provide free technical support for 1 month starts from day one on live .

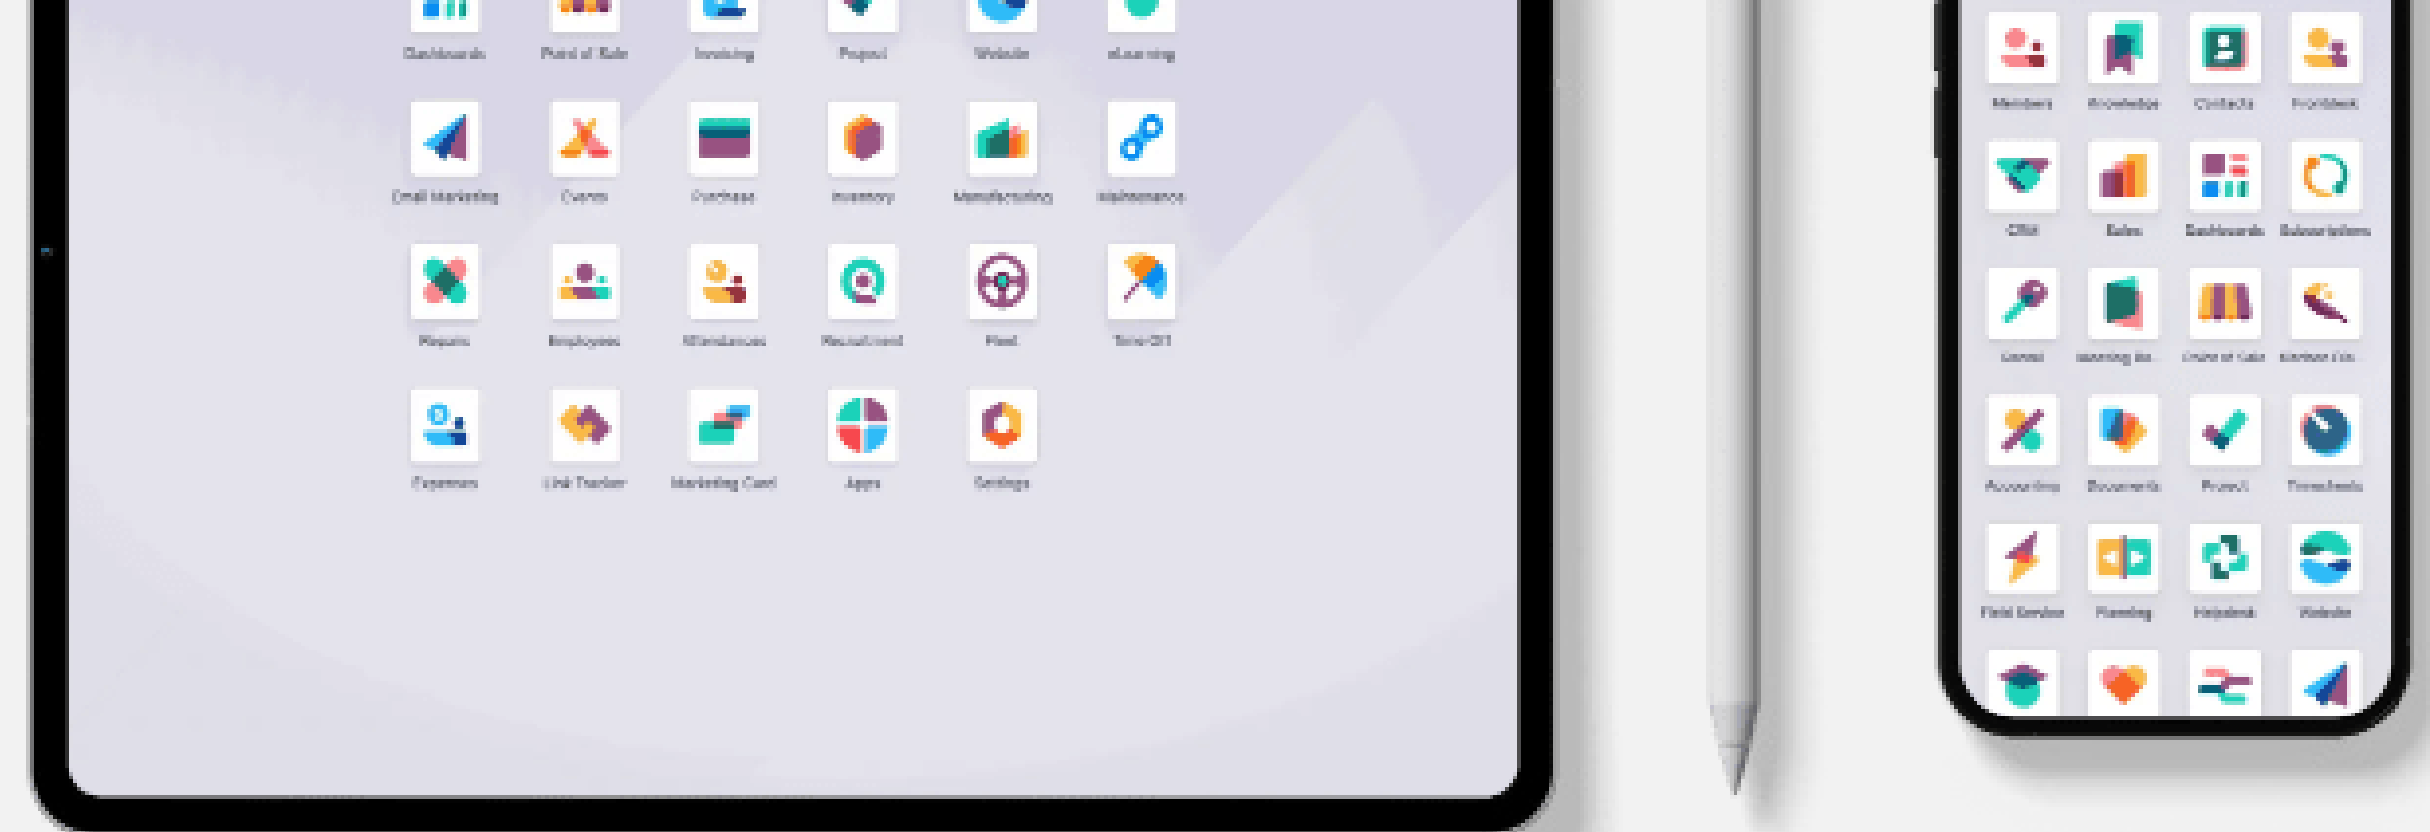

some of our success stories

A licensed Egyptian travel agency (License No. 1604) specializing in visa services Tourist, Student, Business, Conference, and Umrah along with flight bookings and tailored travel arrangements.

Delivered a fully integrated Odoo solution , featuring a customized CRM to strengthen customer relationships, a comprehensive accounting system for streamlined financial management and real-time reporting, and an HR module to optimize workforce operations.
